

# PAULINA HENKEL

## Technical Product Strategist | Systems Thinking | AI Workflows | Environmental Data

Mexico (Remote-ready / Open to relocation) [phsho007@gmail.com](mailto:phsho007@gmail.com) | LinkedIn: paulina-nrv | [www.pauhenkelsho.com](http://www.pauhenkelsho.com) Spanish (Native) | English (Fluent)

**CORE SKILLS:** Product Strategy • Technical Product Management • Systems Thinking • AI Workflows • UX/UI • SaaS Platforms • Environmental Data • Product Operations • Data Visualization • User Research • Cross-functional Collaboration • Figma • Notion • SEO Strategy

## EXPERIENCE

### Technical Product Strategist — SiVeCa Environmental Systems 2023 – Present

- Designed and positioned an environmental intelligence platform focused on data-driven monitoring and decision-making.
- Translated environmental and operational complexity into scalable digital workflows and user-centered interfaces.
- Built product structure aligned with compliance and regulatory frameworks (NOM standards).
- Developed product positioning, SEO strategy and platform communication for industrial and environmental sectors.
- Coordinated product vision across systems, operations and technical implementation.

### Product & Operations — Cisco 2023 – Present

- Supported technology and infrastructure initiatives for private and federal clients.
- Connected real-world operational systems with digital product workflows and technical requirements.
- Conducted field analysis and stakeholder coordination to improve operational execution and delivery.
- Supported product design and systems integration processes across multidisciplinary environments.

### Product & Operations — Trato Hecho (Startup) 2020 – 2021

- Contributed to product strategy, workflow definition and UX-oriented product improvements in an early-stage startup.
- Designed digital experiences, prototypes and communication assets aligned with brand and user needs.
- Supported frontend prototyping, iterative improvements and operational coordination.

## PROJECT HIGHLIGHTS

- Environmental Intelligence SaaS Systems
- AI-assisted workflows and operational systems
- Data visualization and decision-support interfaces
- Startup operations and cross-functional product coordination

## EDUCATION, CETYS Universidad B.S. Digital Design Engineering | 2011 – 2016
