Location: Mexico (Remote-ready / Open to relocation)

Languages: Spanish (Native), English (Fluent)

SUMMARY

Product Designer with a background in Digital Design Engineering, combining systems thinking, UX/UI, and data-driven product development. Experienced in translating complex environments — including environmental data, digital platforms, and operational workflows — into intuitive and actionable solutions. Strong in bridging technical systems, user experience, and real-world operations.

Currently focused on building SaaS platforms and environmental intelligence systems with global applications.

SKILLS

- Product Design (UX/UI)
 - SaaS Product Development
 - Systems Thinking
 - Data Visualization
 - Environmental Data Interpretation
 - SEO Strategy
 - Content Writing
 - Product Strategy
 - User Research
 - Figma, Notion
-

EXPERIENCE

Field & Product Experience — Cisco

2023 – Present

- Contributed to technology and infrastructure projects for private and federal clients, supporting real-world system integration into digital environments
 - Conducted on-site operational and safety analysis, connecting real-world systems with digital product workflows
 - Supported product design processes by translating technical requirements into user-centered solutions
 - Managed client communication and follow-up to align product delivery with stakeholder needs
 - Designed and developed the SiVeCa platform website, positioning it as an environmental data-driven product
-

Product & Operations — Trato Hecho (Startup)

2020 – 2021

- Contributed to product development strategy and workflow definition in an early-stage startup
 - Designed website and digital content aligned with UX and brand positioning
 - Created UI concepts and prototypes using Figma
 - Supported frontend prototyping and iterative product improvements
 - Developed content strategy for social media and product communication
-

Operations & Product Support — La Ruta VCC

(Fecha)

- Supported startup scouting and onboarding processes within a venture ecosystem
 - Debugged mobile and desktop user flows to improve usability and performance
 - Managed client onboarding and data integration into digital platforms
 - Led client acquisition and guided users through product adoption
 - Bridged communication between users and technical teams
-

PROJECTS

SiVeCa — Environmental Intelligence Platform

- Designed and developed a platform for environmental monitoring and decision-making
 - Translated complex environmental data into clear, user-centered interfaces
 - Built a functional system aligned with regulatory frameworks (NOM standards)
 - Developed a compliance-oriented calculator for environmental metrics
 - Applied SEO and content strategy to position the platform in environmental and industrial sectors
 - Defined product vision toward a scalable SaaS environmental intelligence system
 - Positioned the platform as an Environmental Intelligence SaaS concept
-

EDUCATION

CETYS Universidad

B.S. Digital Design Engineering

2011 – 2016

OPTIONAL SECTION — FOCUS AREAS

- Data-Driven Product Design
- Environmental Intelligence Systems
- SaaS Platforms & Digital Tools
- Complex System Interfaces
- Translating Data into Decision-Making
